Grant Vaughn is from the Solicitor's office, representing BIA. Regarding their proposed surface discharge, the end-of-pipe looks to be located off the property, so NDEP will likely issue such a permit.....but there's quite a lot to be explored before such a plan could move forward. Re: UIC, Tetra Tech asserts that the size, slope and make-up (soils) of the current leach area is insufficient to handle the current and future wastewater loads. Not sure I'd entirely agree with them on this, but they seem "hell-bent" on a surface water discharge, and who am I to rain on their parade, at least at this point.

Thanks. So PTP was present and accounted for. I see that Mark Kizer was present, as well as 4 people "representing" him. Who is Grant Vaughn (SOL)?

Subject: BIA-Pineview mtg

Attached is a pdf of the sign-in sheet for yesterday's mtg. Tetra Tech gave a presentation which basically confirmed that the existing system is broken and the best plan of action is to replace it with a state-of-the-art package plant (SBR), which discharges the final effluent to a tributary to the Carson River via an NPDES permit. It appears that BIA will be providing the funding for the project, although some complicating issues relative to the BIA lease, Kizer, PTP and HOA need to be worked-out.....thus all the attorneys.

A follow-up mtg between Kizer, HOA and BIA took place after the main mtg, but it appeared that my participation would have made things a bit awkward given the potential finger-pointing. So, I did not attend this mtg., but told my BIA contact that I'd touch base with him early next week to learn about next steps.
